CORONA OPNS - AP Facility

25X1

MFR by JNMCM

17 Dec 64

25X1

sub: TelCon with [redacted] 16 Dec 64

25X1

[redacted] called to express concern over lack of depth at AP facility manpowerwise. Shld take urgent measures to get personnel asap. Some interim backing for [redacted] at [redacted] during launch of 1015. (16 Dec.) thru 24 Dec.) [redacted] now backing up but needs relief.

25X1

During [redacted] visit to W/C , treated courteously by AF reps but little doubt that it was in AF plan to take over the entire W/C opn. Gen Greer had moved into direct contact with contractors under Agency domain and due to lack of personnel on CIA's part it had been difficult to check these inroads. Mission telemetry is rcd at STC by Gen Greer prior to its receipt at AP facility and he ~~and~~ his personnel are able to query what such telemetry means prior to our people receiving it.

25X1

[redacted] invited McMillan during the visit to see the AP facility, briefed him, showed him around.

McMillan's interests: (besides technical) (1) Possibility of duplication and multiplicity of commands--Greer on one hand and Agency through [redacted] on the other. (2) Procedures, flow of information, priority origination and decision, documentation flow. (3) Operational decisions, such choice of filters-- [redacted] with coordination of all technical contractors available to him).

25X1

25X1

[redacted] in parting from McMillan indicated that [redacted] was temporarily filling in the vacancy which had been caused at AP facility (McMillan/Greer had been responsible). McMillan acknowledged the fact without comment.

25X1

(2/Cat. Vernal Webb case) -

NRO review(s) completed.
